/// Company profile

Jubei Group is the world's leading comprehensive service provider of full scenario water purification system station type products, focusing on the development of cutting-edge technology, material research, intelligent research, industrial design, terminal equipment research and development, creating an intelligent manufacturing platform and supply chain ecosystem for the whole industrial chain production, and empowering its Beishi, Beirui, Beihuang Jincheng and other enterprises and institutions and more than ten subsidiaries jointly provide product and valued services for global first-line brands.

Leader unit for drafting 7 industry group standards of National Health Industry Enterprise Management Association

- ★ Household and similar pre filters without disassembly and cleaning (group standard drafting team leader)
- ★ Purified shower for household and similar purposes (vice group leader in drafting group standards)
- ★ Ultrasonic water leakage protector for household and similar purposes (group standard drafting team leader)
- ★ Household and similar water scale inhibition filters (group standard drafting team
- ★ Intelligent Internet of Things prefilter for household and similar purposes (group standard drafting team leader)
- ★ Prefilter（group standard drafting team leader）
- ★ Deputy leader unit of the group standard of （effluent quality standard of water quality processor）

600+
National patented technology

500+
The common choice of first-line brands

15 Million
Units annual manufacturing capacity

7 Industry
Group standards drafting team leader units

9 years of continuous doubling growth

Pre-filter

Bath and body care

Leak protector

Bathroom &kitchen scale inhibitor

Direct drinking water

Commercial water purification

Mobile mini pure water bar

Pragmatic, healthy and convenient

It has all features you wanted

It sets purification, heating, temperature regulation, quantity control, no installation and other functions in one

It can easily meet different needs of soaking

Water purification machine

Water drinking machine

Health pot

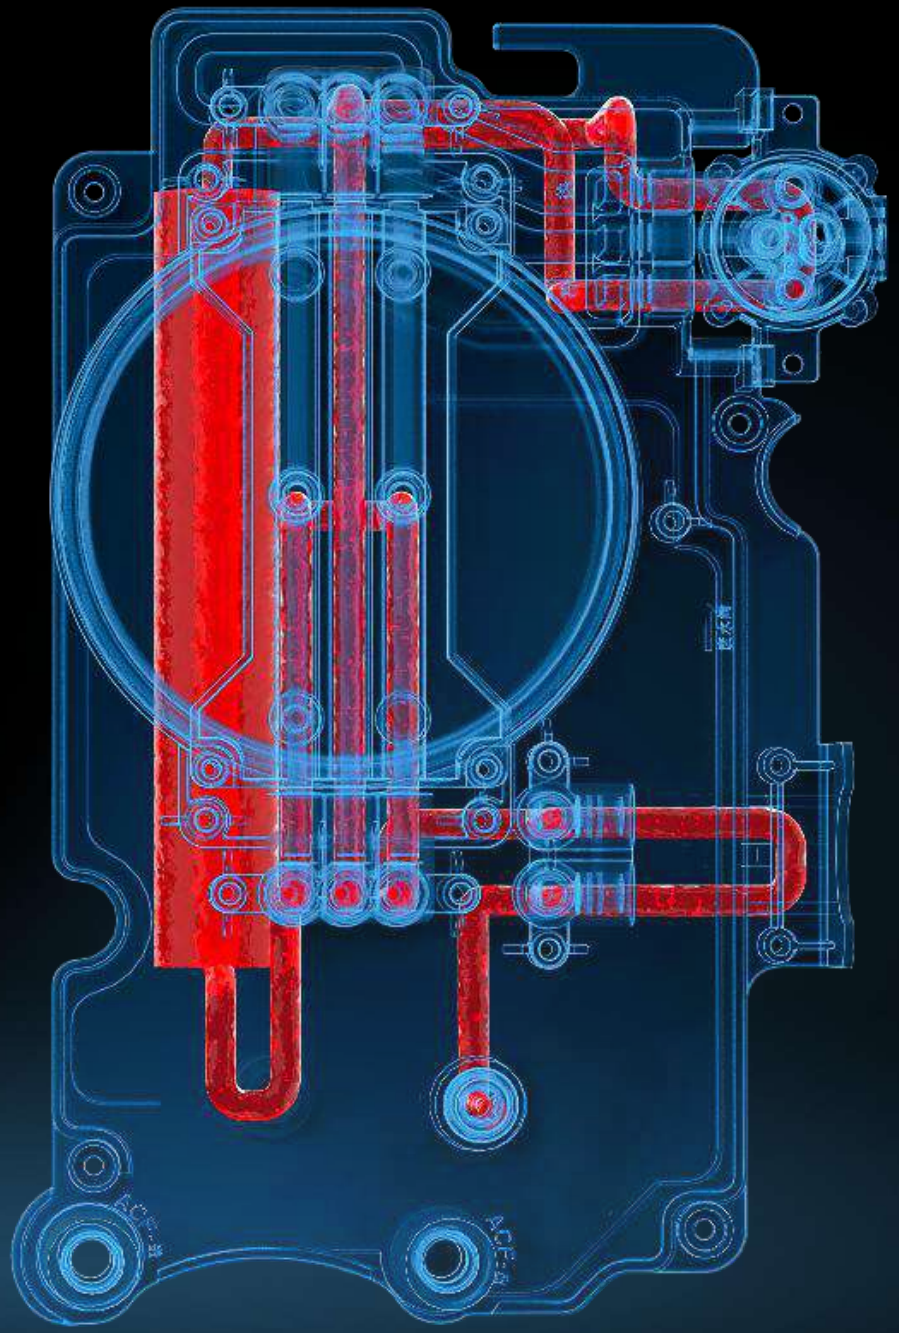

Foaming milk machine

Milk kettle

Tea making machine

Sterilized through Hot Runner Systems to ensure water safety

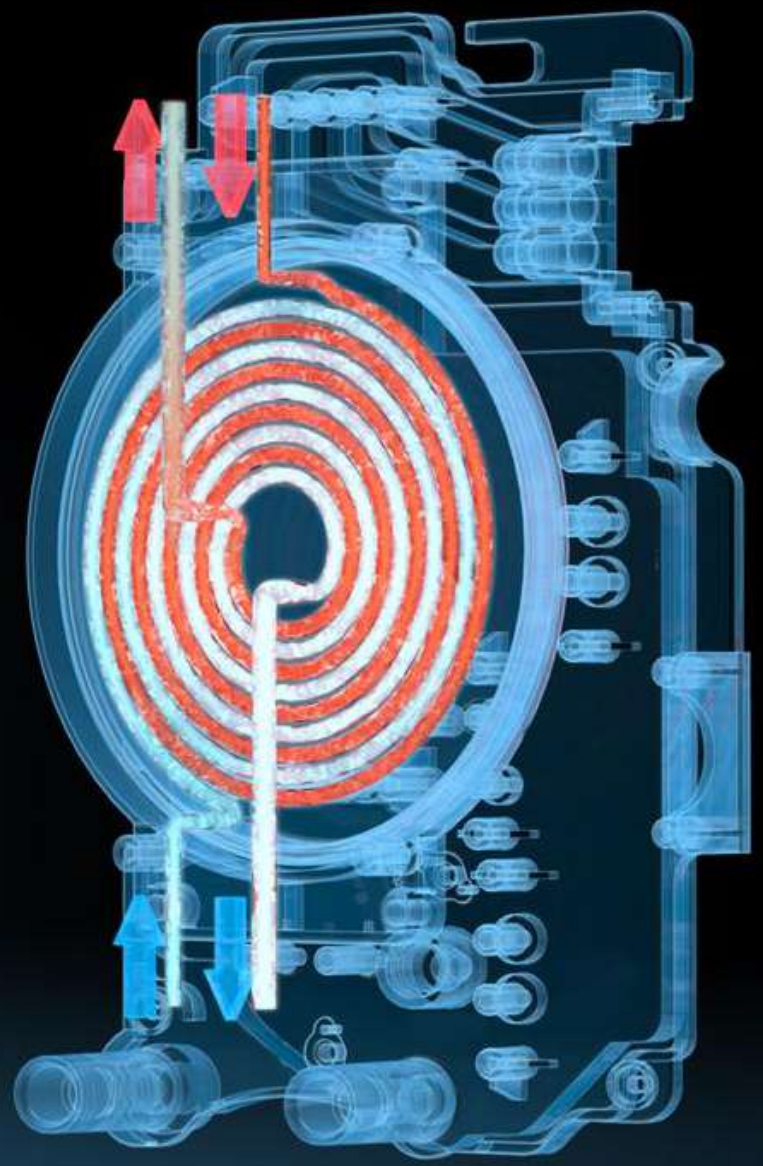

Sterilized through water circulation by Hot Runner Systems to ensure water safety

DHES

Adaptive spiral heat exchange system
Drink healthy cold boiled water

Equipped with intelligent control system, it adopts a new generation of rare earth thick film heating technology,
3 seconds quick heat, quickly boil water, after boiling water through rapid cooling technology,
Quickly drop to the set temperature, at any time to enjoy fresh pure suitable temperature of the right amount of cold water

Three gears setted to meet commonly used water temperature
Only press one button can water flow out , which is convenient and practical

Three gears setted to meet commonly used water temperature, only press one button can water flow out, and no need to blend. It can meet most families’ daily drinking need.

Composite element technology Filter + improve taste, clean drink without odor

The first: PR composite filter element
Intercept colloid, scale impurities, toner and other small particle impurities;
Adsorption of residual chlorine, heterochromatic odor, organic pollutants
Efficient filtration of bacteria, viruses, heavy metals, antibiotics, pesticide residues
While maintaining stable purification capacity, the filtration accuracy is up to 0.0001 micron,
Powerful filter 110 kinds of harmful substances.

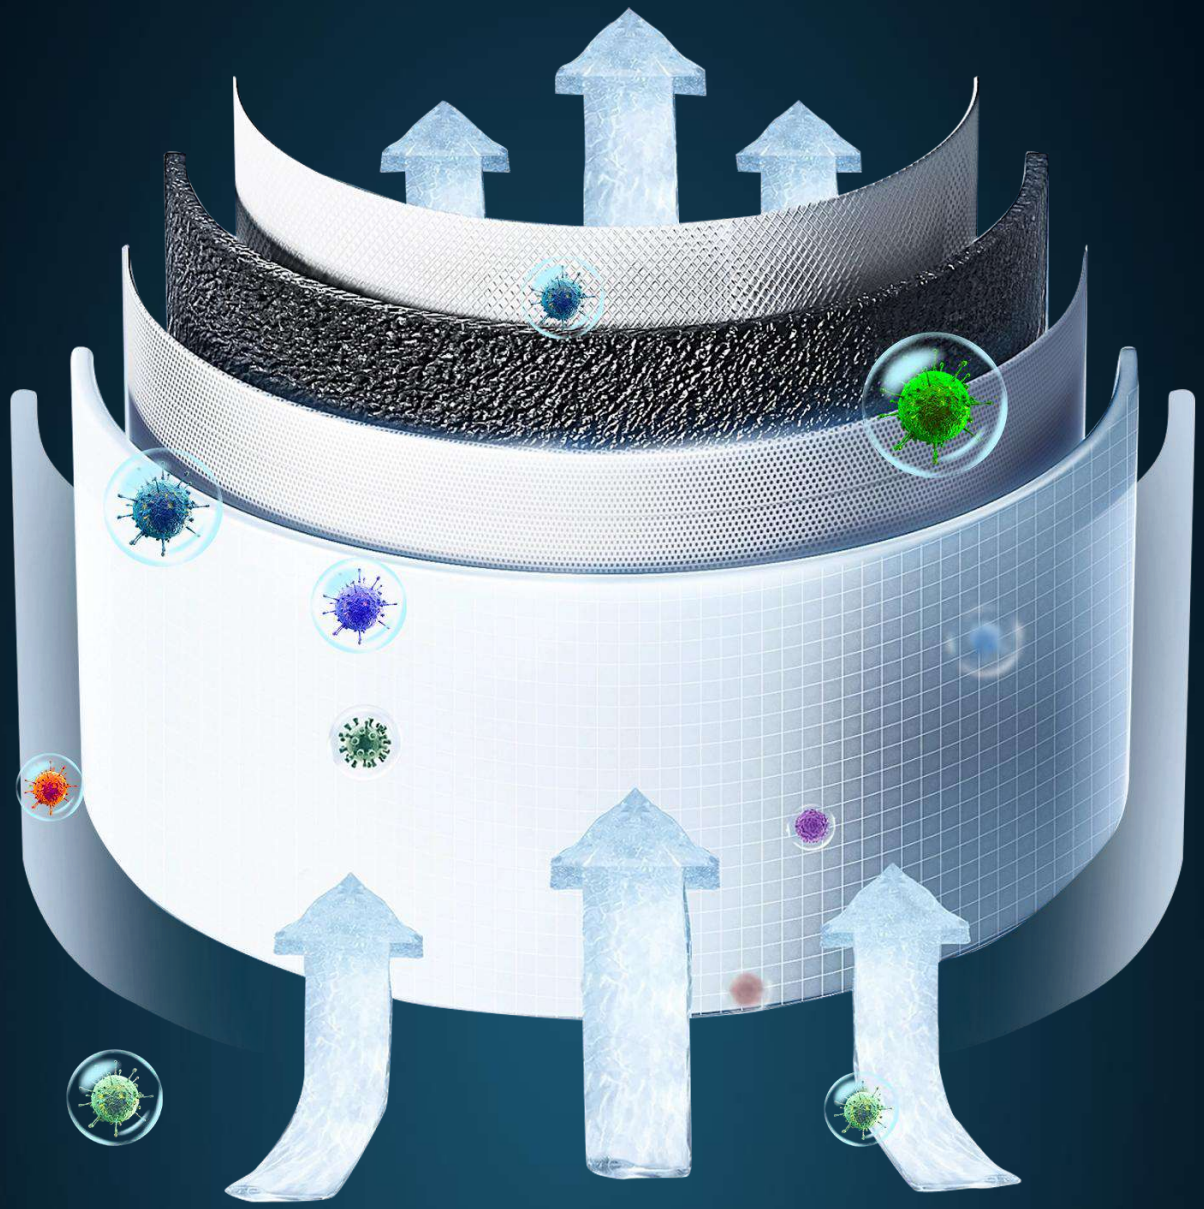

Second: ACFALL filter element (strontium optional)
Improve the taste, while soaking coral essence into special activated carbon fibers,
The rich mineral elements in coral are incorporated into everyday drinking water,
You can turn on the tap and drink fresh, refreshing water rich in minerals,
Give the human body multiple needed nutrients and minerals, health and peace of mind

Years of natural tempering

The natural bounty of the sea

The tank has more capacity
No need to replace frequently

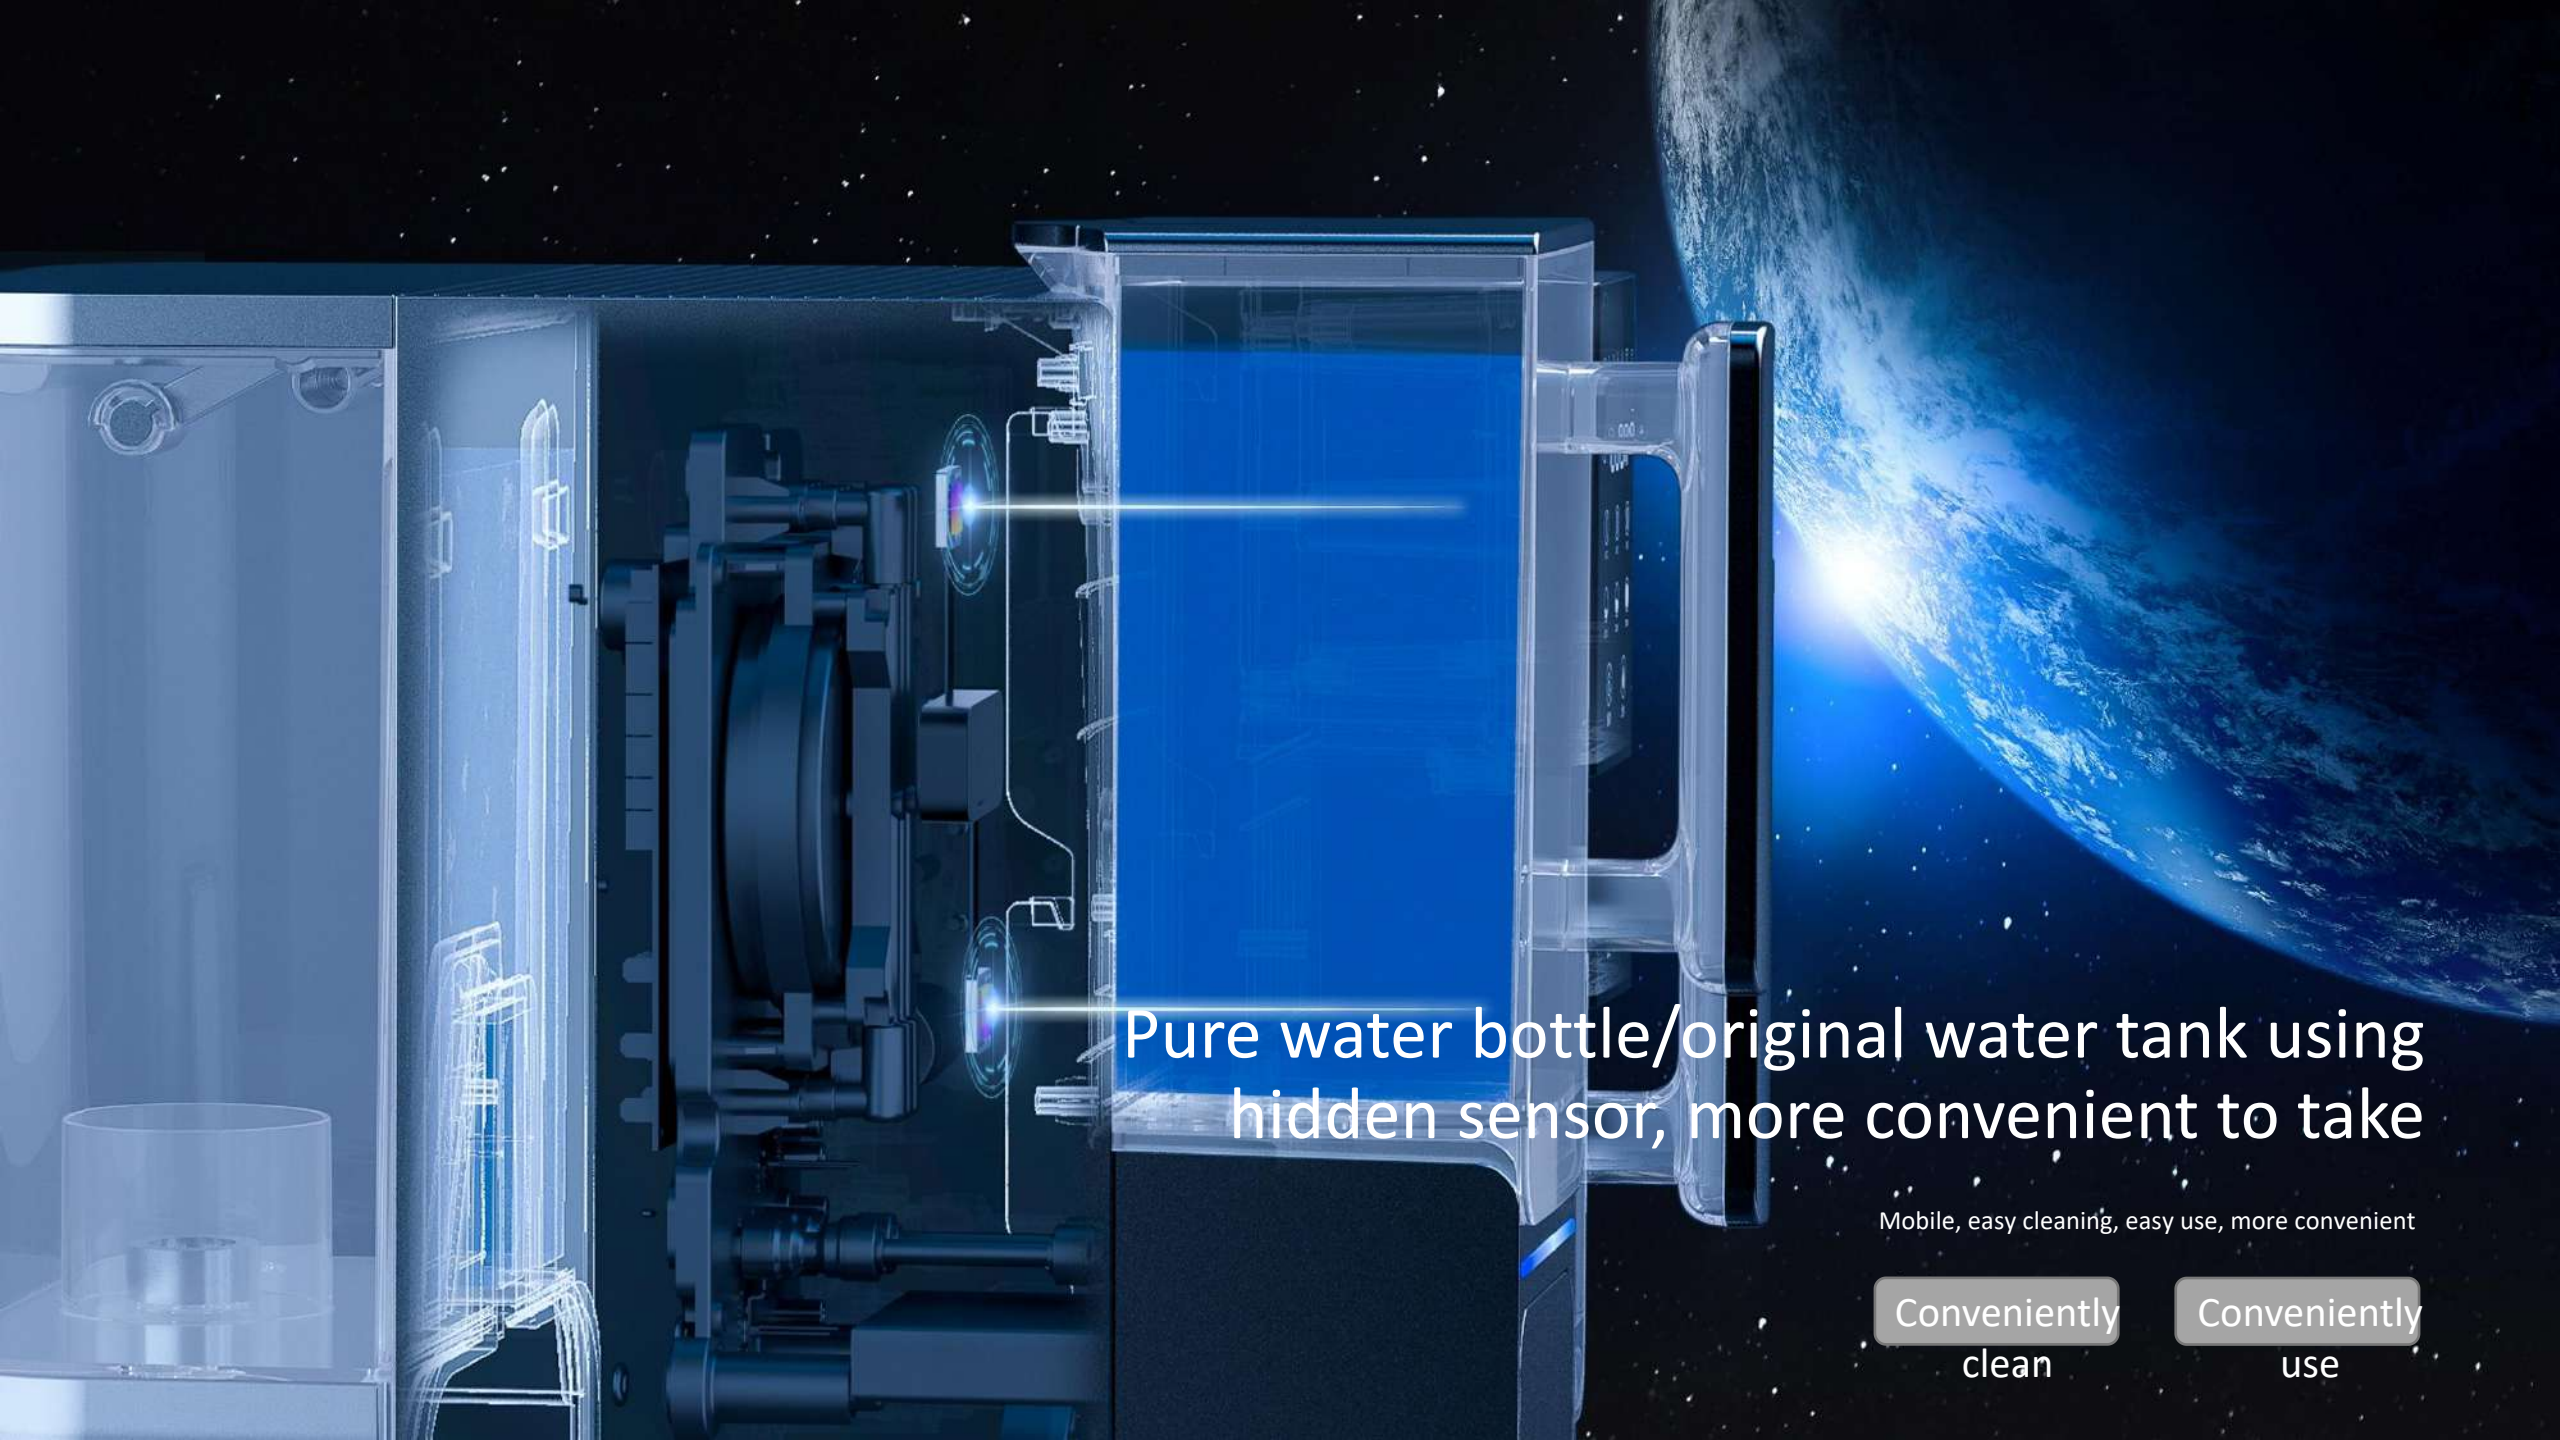

5L original water tank to avoid frequent water change, 1.4L external clean water tank,
Large water output, 100G/150G large flux, do not wait for drinking water.

Self-innovated cutting-edge technology
Make water without waiting

Clean water bottle set into the same
hole, and no need to wait to make water.

Pure water bottle/original water tank using hidden sensor, more convenient to take
Mobile, easy cleaning, easy use, more convenient
Conveniently clean
Conveniently use

Easy to take many scenarios, no installation, plug and use

No installation, plug and play, to meet a variety of scenarios, living room, kitchen, bedroom, office can be placed, anytime and anywhere to enjoy

Clean water is not "high profile", and enjoy the clean water in peace.

Making water in low decibel, smooth and make no noise, and arbitrary placement are not afraid to be disturbed.

Intelligent touch panel with comprehensive functions

IMD technology, no fade, wear and more clear

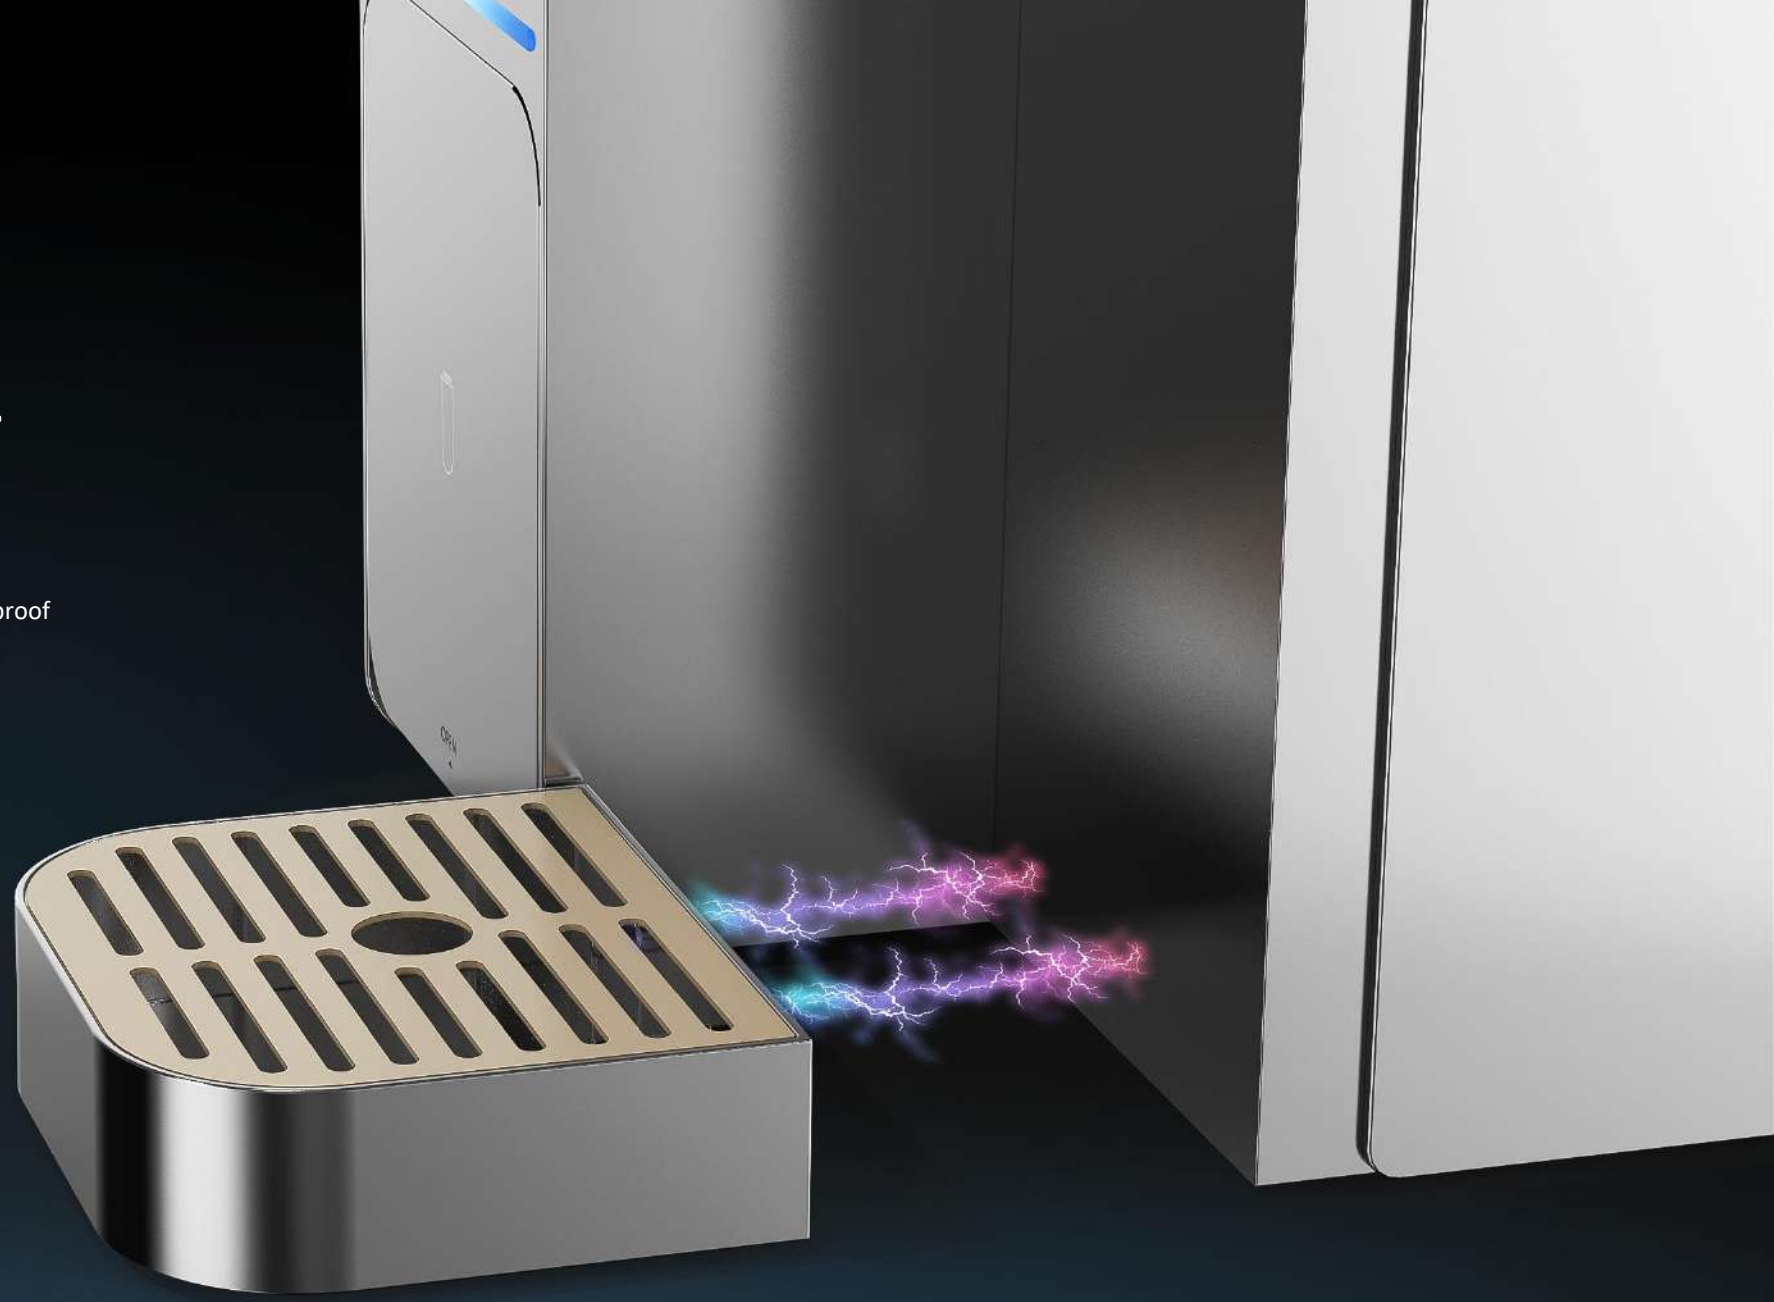

Magnetic type water tray

Magnetic type water tray, take and put freely with waterproof

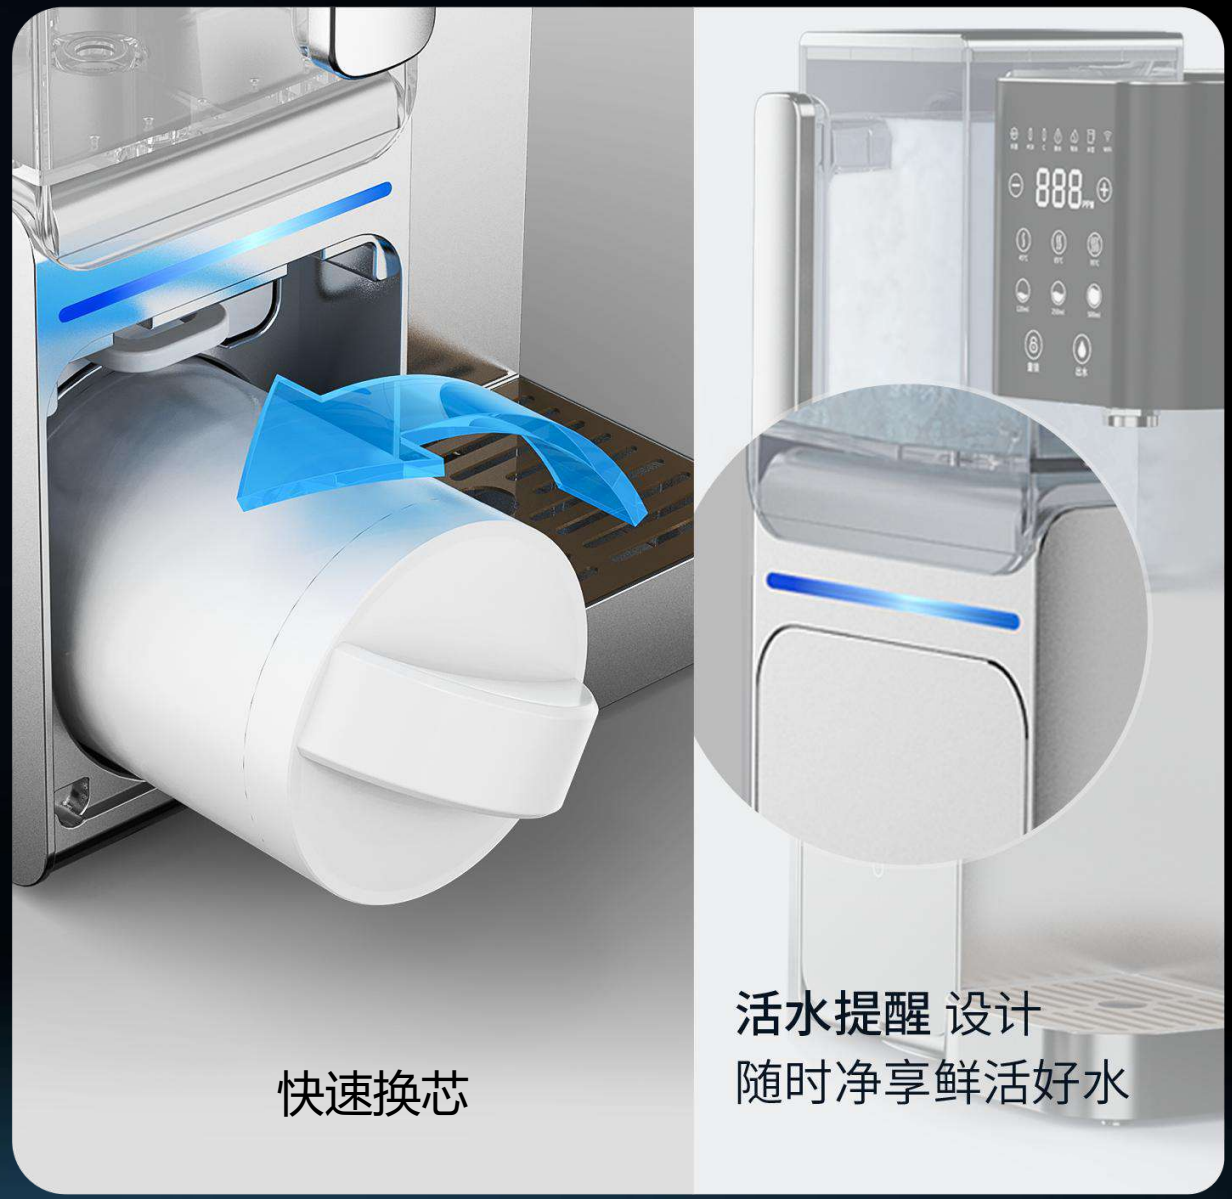

磁吸式　防飞溅　内置磁铁

Magnetic type
Water proof
Built-in magnet

FAST side pumping fast core change
Running water reminder design

FAST side pumping fast core change, only a spin and a pull can finish the change
When the pure kettle is placed for more than 12h, the running water reminder will turn red

External pure kettle, original water tank, suitable for multiple application scenarios

Integral clamshell water tank, clamshell is not detached, convenient and safe, external pure kettle, the original water tank is easy to move, suitable for multiple application scenarios

Convenient washing

Integrated box cover

Mobile

Making soup

Can be placed in refrigerator

Product parameter

Product name	Reverse osmosis drinker
Product type	JBBD-L1JL15-06~10　JBBD-L1JL10-06~10
Rated clean water flow	0.4L/min　0.26L/min
Rated total net water volume	4000L　2000L
Function type	Cold boiled water
Rated voltage/frequency	220V~/50Hz
Total rated power	2200W
Hot water capacity	20L/H,≥90℃
Applicable water source	Municipal tap water
Applicable water temperature	5-38℃
Ambient temperature	4℃ ~ 40℃
Product size	230.8*420*375mm（Width*Depth*Height）
Effluent quality	In line with the Standards for Hygienic Safety and Functional Evaluation of Drinking Water Quality Processors - Reverse Osmosis Treatment Device

Enjoy clean water and luxury life

Clean and hot integrated machine without installation, and can be used at anytime and anywhere. Enjoy a healthy, delicate and luxury water life.
